## Rain tent Babboe Curve – Manual for mounting

---

Congratulations on your new rain tent for your Babboe Curve cargo bike!

Below you will find the instruction manual for the rain tent. To dismount the tent, follow the steps in the reverse order.

### Step 1. Attaching the side bars to the box

Use the provided sidebars to attach the tent properly. Unscrew the central nuts and bolts at the sides of the box. Attach the sidebars with these nuts and bolts, leaving the shims out. You can remove the bench from the slot to make it easier to remove the nuts and bolts.

### Step 2. Mounting the poles to the box

Mounting the poles to the carrier is simple, however, it should happen in the following order:

1. First, place the poles on the side of the handlebar (green sticker BACK). Assemble the poles and then insert them into the slots on the side of the handlebar up to wider section of the poles.
2. Then, assemble the front poles (red sticker FRONT) and insert them into the slots of the box at the front
3. Then, insert the central part in the curved sections at the front side and the side of the handle bar
4. Insert both parts of the central bar in the middle. This creates the necessary tension on the poles, ensuring a secure structure

### Step 3. Attaching the canvas

The order of assembly is essential for an optimum fit:

1. Unfold the tent canvas and unzip all zips
2. Place the canvas over the poles, the long side on the side and the short side with Velcro (for the handlebar) at the side of the handlebar. The side with an opening for ventilation is placed at the front.
3. Pull the canvas downwards and close all zips. Make sure the poles are correctly inserted in the sleeves of the canvas
4. Feed the tie down straps through the sidebars and tighten slightly
5. Is the tent in place? Then tighten all tie down straps so the tent is secure
6. Feed the ends of the tie down straps through the lip so they won't flap around in the wind

### TIP!

A sunroof is also available for use in combination with the poles of the rain tent.
